Problem Statement

In Australia, many people spend years, sometimes decades working in the same field. When they decide to change direction, the process often feels daunting. Workers are unsure which roles might suit their abilities, whether their current skills are still relevant, and what training could realistically help them secure a new position. At present, useful information is scattered across job boards, blogs, government sites, and training providers. Without a clear guide, mid career workers can end up frustrated, underemployed, or stepping into roles that don't make use of their strengths. There is a clear need for a single platform that allows people to explore new industries, understand the skills they already bring to the table, identify what is missing, and connect with practical training and support to make a career transition achievable.

Epic 5 – Industry Trend Insights

Description:

Provide long-term employment and salary trends with five-year forecasts, using open datasets and interactive dashboards.

Epic 6 – Career Jargon Decoder

Description:

Provide a jargon and acronym dictionary for job seekers, across multiple sectors, with plain-language explanations.

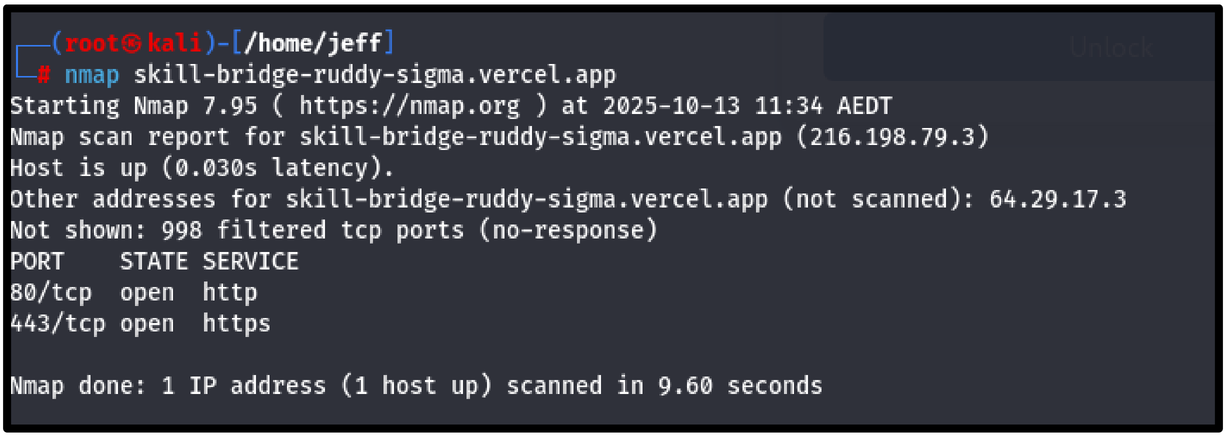
Security Testing

Nmap:

Nmap is a powerful open-source tool used for network discovery and security auditing. It scans hosts and services on a network to identify open ports, running services, operating system details, and potential vulnerabilities. Nmap supports advanced features such as OS fingerprinting, version detection, vulnerability scripts, and traceroute. Security professionals commonly use it for reconnaissance during penetration testing to map the attack surface of a target system.

Nmap Findings:

1. **Basic Port Scan**

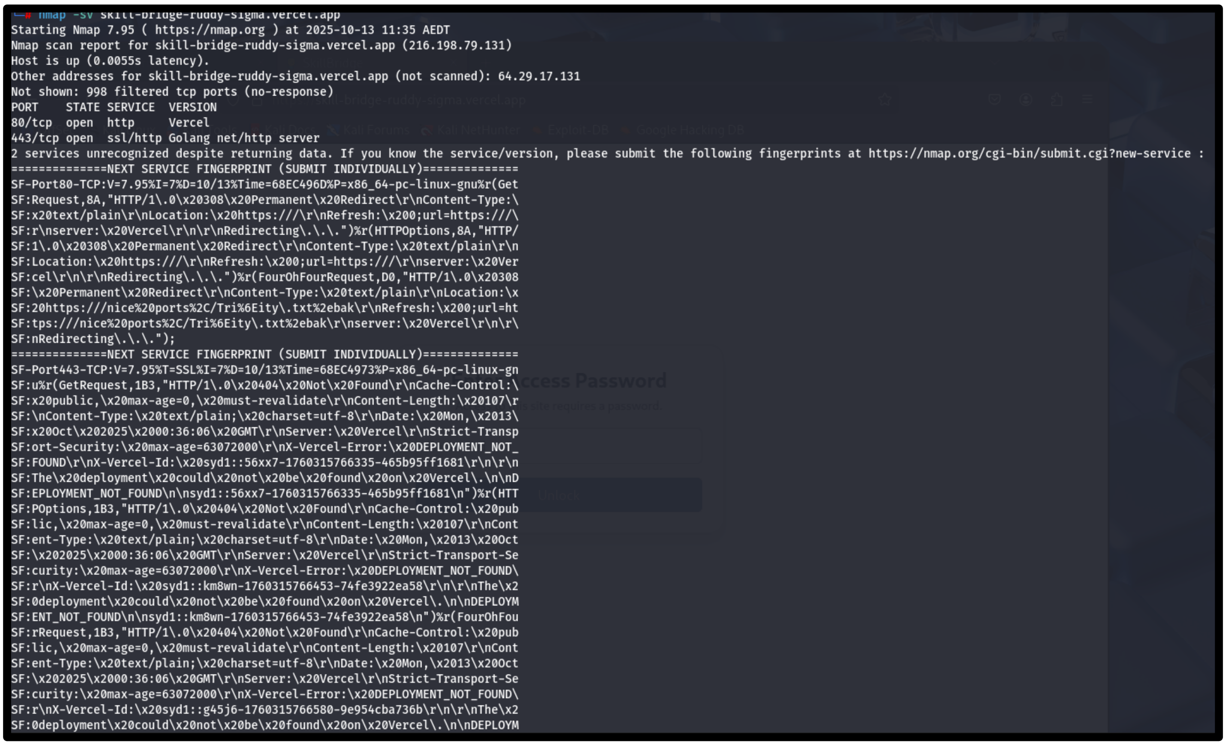


```
┌──(root㉿kali)-[/home/jeff]
└─# nmap skill-bridge-ruddy-sigma.vercel.app
Starting Nmap 7.95 ( https://nmap.org ) at 2025-10-13 11:34 AEDT
Nmap scan report for skill-bridge-ruddy-sigma.vercel.app (216.198.79.3)
Host is up (0.030s latency).
Other addresses for skill-bridge-ruddy-sigma.vercel.app (not scanned): 64.29.17.3
Not shown: 998 filtered tcp ports (no-response)
PORT    STATE SERVICE
80/tcp  open  http
443/tcp open  https

Nmap done: 1 IP address (1 host up) scanned in 9.60 seconds
```

Fig 2

2. **Service Version Detection**



```
└─# nmap -sV skill-bridge-ruddy-sigma.vercel.app
Starting Nmap 7.95 ( https://nmap.org ) at 2025-10-13 11:35 AEDT
Nmap scan report for skill-bridge-ruddy-sigma.vercel.app (216.198.79.131)
Host is up (0.0055s latency).
Other addresses for skill-bridge-ruddy-sigma.vercel.app (not scanned): 64.29.17.131
Not shown: 998 filtered tcp ports (no-response)
PORT    STATE SERVICE  VERSION
80/tcp  open  http     Vercel
443/tcp open  ssl/http Golang net/http server
2 services unrecognized despite returning data. If you know the service/version, please submit the following fingerprints at https://nmap.org/cgi-bin/submit.cgi?new-service :

Nikto:

Nikto is an open-source web server vulnerability scanner. It performs comprehensive tests against web servers to identify misconfigurations, insecure files, outdated software, and known vulnerabilities. Nikto checks for over 6,700 potentially dangerous files/programs and verifies versions of web servers against vulnerability databases. It is particularly useful in identifying issues like default files, outdated SSL/TLS settings, insecure headers, and improper configurations.

Nikto Findings:

1. Basic Scan:

Burpsuite:

Burp Suite is an integrated platform and industry-standard toolkit for performing security testing of web applications. It acts as an intercepting proxy that sits between your browser and the target application, allowing security testers to view, analyse, and modify HTTP/HTTPS traffic in real-time.

Burpsuite Findings (SQL Injection):
